E5MX

5" monobloc borehole pumps

WATER SUPPLY

DOMESTIC

PROFESSIONAL AGRICULTURE

INDUSTRIES

The new 5" monobloc borehole pumps from the EASYWELL family.

Its stainless steel structure gives the E5MX resistant to corrosion. Technopolymer impellers and diffusers ensure high resistance to sand.

The electric motor is protected by a double mechanical seal, guarantees long life over time.

VERSATILITY

The single-phase series can be equipped with:

- an internal or external condenser associated electrical panel
- floating for automatic start up

RELIABILITY

100%
TESTED

E5MX

5" monobloc borehole pumps

SIZES

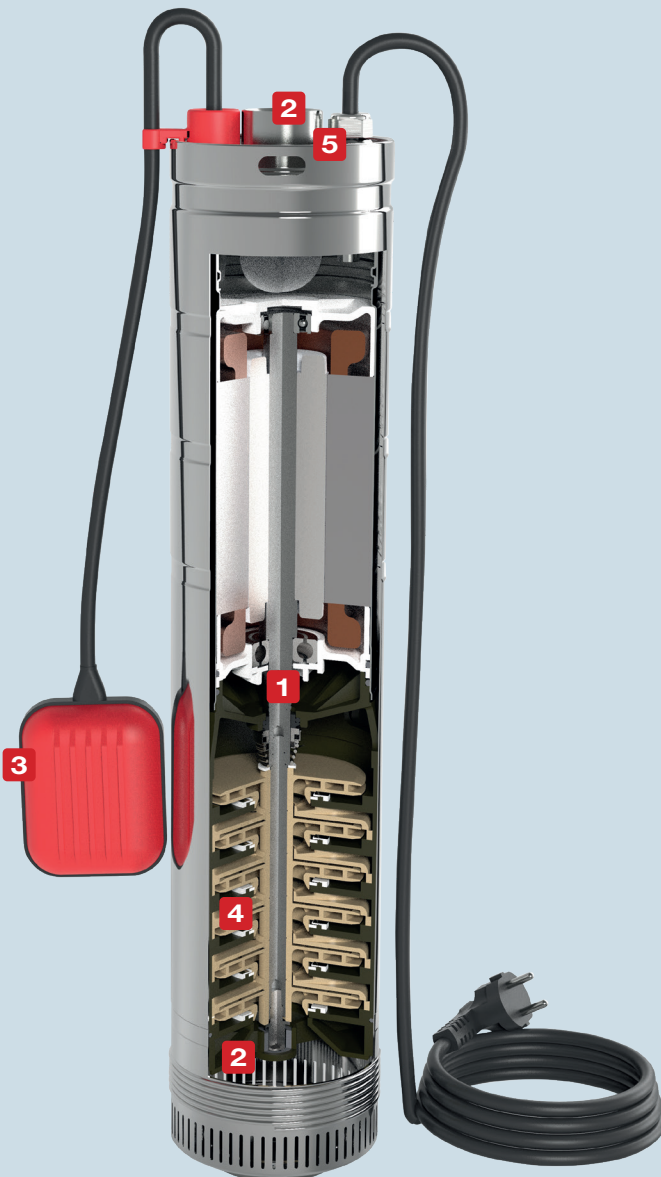

10
MODELS

PERFORMANCE

Frequency	50Hz
Voltage	230V single-phase 230/400V three-phase
Flow rate	up to 8,4m ³ /h
Head	up to 90m
Power	up to 1,5kW
Sand content (max)	50g/m ³

ACCESSORIES

- + 1. PLUG IN floating
- + 2. Kit for changing from automatic to manual

- 1** Double mechanical seal with interposed oil chamber.
HIGH PROTECTION FOR THE ELECTRICAL MOTOR
- 2** Stainless steel casing, filter and discharge outlet
DURABILITY AND EXTREME CORROSION RESISTANCE
- 3** PLUG IN floating.
VERSATILITY OF USE, WATER-TIGHT SEALS, EASY MAINTENANCE
- 4** Impellers and diffusers in technopolymer.
HIGH PERFORMANCE AND RESISTANCE TO SAND
- 5** SINGLE-PHASE SERIES
 - Overload protection with automatic restart: MOTOR PROTECTION
 - Class B internal capacitor: 3 TIMES MORE DURABILITY
